

Sakshi Shivappa Sajjed

Bengaluru | sakshisajjed@gmail.com | 8106775757 | www.linkedin.com/in/sakshisajjed/

OBJECTIVE

A driven and results-oriented engineering student passionate about software development and AI-driven solutions, with hands-on experience in Java, Python, SQL, Spring Boot, and deep learning. Skilled in developing full-stack web applications, data-driven systems, and real-time analytical tools integrating machine learning and IoT concepts. A collaborative and adaptable problem-solver with strong communication, leadership, and analytical abilities, committed to designing scalable, efficient, and impactful solutions through innovation and teamwork.

EDUCATION

B-Tech | Electronics and Communication | 8.3 GPA

Nitte Meenakshi Institute of Technology, Visvesvaraya Technology University

Bangalore, India

11, 2022 – 06, 2026

PU | PCMB | 79 % Percentage

KLE's Prerana PU College, State Board

Hubballi, India

07, 2020 – 04, 2022

Class X | 92 % Percentage

Etasi Timpany Steel City School, CBSE

Visakhapatnam, India

04, 2019 – 03, 2020

SKILLS

- **Programming** : Java, Python, C++
- **Database** : MySQL, Oracle
- **WebTech** : HTML5, CSS3, JavaScript
- **Tools** : MS Office, MATLAB, Cadence Virtuoso, Logism, LtSpice, GitHub
- **Domains** : DSA, OOPS, DBMS, Machine Learning, Computer Networks, Embedded Systems and IoT
- **OS** : Linux, Windows

PROJECTS

College Resource and Alumni Portal (Java Full Stack Web Application)

06, 2025 – 07, 2025

Tech Stack: HTML, CSS, JavaScript, Spring Boot (Java), MySQL, Bootstrap

- Developed a full-stack web platform enabling seamless interaction between students and alumni for networking and resource sharing, featuring secure authentication, alumni directory, and event management modules using Spring Boot, MySQL, and Bootstrap.
- Designed and optimized responsive UI and backend APIs to ensure efficient data handling, scalability, and a smooth user experience.

Global Air Quality Prediction System (AI & ML-Based)

04, 2024 – 05, 2024

Tech Stack: Python, Pandas, NumPy, Scikit-learn, OpenWeatherMap API, Machine Learning, Artificial Intelligence, Data Cleaning, API Integration, Data Visualization

- Developed a hybrid AI-ML model integrating Linear Regression and a Neural Network (MLP Regressor) to predict Air Quality Index (AQI) trends using real-time data from the OpenAQ API.
- Implemented data preprocessing, feature scaling, and performance comparison between traditional ML and AI models, visualizing results through Python analytics dashboards for global environmental monitoring.

CERTIFICATIONS / INTERNSHIPS

Bharatiya Antariksh Hackathon 2025 (ISRO)

03, 2023 – 04, 2023

- Proposed an AI and ML-based environmental change detection system leveraging multi-temporal satellite imagery, deep learning, and geospatial analytics to identify and classify changes such as urban expansion, illegal mining, and forest cover depletion.

Internship on Embedded Systems and IoT

03, 2023 – 04, 2023

- Developed and optimized real-time embedded and IoT systems using C/C++, focusing on performance, power efficiency, and reliability. Integrated microcontrollers, sensors, and communication protocols, ensuring seamless hardware-software interaction and robust system validation.

EXTRA CURRICULAR

- **Dance Club (Core Member)**: Active member of the college's official contemporary dance team; won national-level competitions at premier institutes including IIT Bombay, NIT Trichy, IIT Madras, IISc Bengaluru, and IIM Bengaluru.
- **Geekmayhem Club (Core Member as Registration Desk Lead)**: Led operations during the annual tech fest—managing end-to-end participant coordination, streamlining registration workflows, and ensuring a seamless event experience.
- **Alumni Club (Core Member as a Content Lead)**: Led the content team, overseeing content strategy and execution for a successful alumni meet, including event planning, communications, and promotional material development.
- **IEEE Member (Active Member) and Volunteering**: IEEE events, placement events.
